JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject Index of Volume 464

Absolute methanol
Infrared spectroelectrochemistry of the oxidation of absolute methanol at a platinum electrode, 93
Ac impedance
Evaluation of model and dispersion parameters and their effects on the formation of constant-phase elements in equivalent circuits, 68
Studies of structural disorder of self-assembled thiol monolayers on gold by cyclic voltammetry and ac impedance, 61
Alkali cations
Voltammetric analysis of Cs^+-DB18C6 complex stoichiometry at the water | 1,2-dichloroethane interface, 54
Alkyl halide reduction
A microelectrode study of the catalysis of alkyl halide reduction by Co(II)(salen), 168
Anion radicals
Solvent effect on kinetics of the chloride ion cleavage from anion radicals of 4-chlorobenzophenone, 259
Anodic oxidation
Mechanistic investigation of the anodic oxidation of *p*-methoxytoluene in dry and wet acetonitrile, 85
Au(111)
Comments on 'On the calculation of surface concentration from the measurement by the radiotracer 'electrode lowering' technique' by D. Poskus, 118
Au electrode
Cationic systems as self-assembled monolayers on gold surfaces, 263

Backscattering factor
Comments on 'On the calculation of surface concentration from the measurement by the radiotracer 'electrode lowering' technique' by D. Poskus, 118
Bentonite
Modified electrodes based on mixed bentonite vanadium(V) oxide xerogels, 48
Biofuel cell
Electro-enzymatic reduction of dioxygen to water in the cathode compartment of a biofuel cell, 110

Capacitive current
The fast dropping oil | water electrode, 128
Carbonate sensor
Ion sensors using one-component room temperature vulcanized-type silicone rubber matrices, 135
Catalysis
A microelectrode study of the catalysis of alkyl halide reduction by Co(II)(salen), 168
Cathode
Electro-enzymatic reduction of dioxygen to water in the cathode compartment of a biofuel cell, 110
Cesium
Voltammetric analysis of Cs^+-DB18C6 complex stoichiometry at the water | 1,2-dichloroethane interface, 54
Channel flow cell
Spectroelectrochemistry for a coupled chemical reaction in the channel cell: Part I. Theoretical simulation of an EC reaction, 176
Chemically modified electrode
Cationic systems as self-assembled monolayers on gold surfaces, 263
Chlorogenic acid
Electrocatalytic oxidation of reduced nicotinamide adenine dinucleotide (NADH) at a chlorogenic acid modified glassy carbon electrode, 14
Chronoamperometry
Convolutive modelling of electrochemical processes based on the relationship between the current and the surface concentration, 1
The kinetics of mercury nucleation from Hg_2^{2+} and Hg^{2+} solutions on vitreous carbon electrodes, 39
Chronocoulometry
Convolutive modelling of electrochemical processes based on the relationship between the current and the surface concentration, 1
Co(II)(salen)
A microelectrode study of the catalysis of alkyl halide reduction by Co(II)(salen), 168
Conductive polymer
Pyruvate sensor based on pyruvate oxidase immobilized in a poly(mercapto-*p*-benzoquinone) film, 143
σ–π-Conjugation
Electrochemical oxidation of poly[(hexamethyltrisilanylene)oligo(2,5-thienylene)] films, 158
Convective separation processes
Convective electrodiffusion processes through graft-modified charged porous membranes, 222
Convolution integral
Convolutive modelling of electrochemical processes based on the relationship between the current and the surface concentration, 1
Co_3O_4
An old workhorse of oxide investigations: new features of Co_3O_4, 149
Copper electrodeposition
A new approach to metal electrodeposition at a periodically changing rate: Part I. The reversing overpotential method, 245
Copper electrodes
Electrochemical oxidation of mono- and disaccharides at fresh as well as oxidized copper electrodes in alkaline media, 252
Crown ether ferrocene
Electrochemical recognition of metal cations by poly(crown ether ferrocene) films investigated by cyclic voltammetry and electrochemical impedance spectroscopy, 24
Cyclic voltammetry
Cationic systems as self-assembled monolayers on gold surfaces, 263

PII: S0022-0728(99)00076-5

Characterization of protein monolayers by surface plasmon resonance combined with cyclic voltammetry 'in situ', 198
Convolutive modelling of electrochemical processes based on the relationship between the current and the surface concentration, 1
Electrochemical recognition of metal cations by poly(crown ether ferrocene) films investigated by cyclic voltammetry and electrochemical impedance spectroscopy, 24
Investigation of the lifetimes of some pyrrole species by rapid scan cyclic voltammetry and double potential step techniques, 123
Studies of structural disorder of self-assembled thiol monolayers on gold by cyclic voltammetry and ac impedance, 61
Cyclization
Mechanism of stereoselective production of *trans*-1-decalone by electrochemical catalysis in microemulsions, 31
Cytochrome c_{552}
Electrochemical studies on *c*-type cytochromes at microelectrodes, 76
Cytochrome c_{553}
Electrochemical studies on *c*-type cytochromes at microelectrodes, 76

Deposition
Diamond-like carbon electrodes in electrochemical microgravimetry, 230
Diamond-like carbon
Diamond-like carbon electrodes in electrochemical microgravimetry, 230
Dibenzo-18-crown-6
Voltammetric analysis of Cs^+-DB18C6 complex stoichiometry at the water | 1,2-dichloroethane interface, 54
Differential capacity
The fast dropping oil | water electrode, 128
Digital simulation
Digital simulation of fast cyclic voltammogram by integration of the double layer charging current, 215
Dioxygen
Electro-enzymatic reduction of dioxygen to water in the cathode compartment of a biofuel cell, 110
Disaccharides
Electrochemical oxidation of mono- and disaccharides at fresh as well as oxidized copper electrodes in alkaline media, 252
Distribution
Evaluation of model and dispersion parameters and their effects on the formation of constant-phase elements in equivalent circuits, 68
Doping
Electrochemical oxidation of poly[(hexamethyltrisilanylene)-oligo(2,5-thienylene)] films, 158
Double potential step chronoamperometry
Investigation of the lifetimes of some pyrrole species by rapid scan cyclic voltammetry and double potential step techniques, 123

EC reaction
Spectroelectrochemistry for a coupled chemical reaction in the channel cell: Part II. Kinetics of hydrolysis and the absorption spectrum of *p*-benzoquinoneimine 181
Spectroelectrochemistry for a coupled chemical reaction in the channel cell: Part I. Theoretical simulation of an EC reaction, 176
Electrocatalytic oxidation
Electrocatalytic oxidation of NADH at graphite electrodes modified with osmium phenanthrolinedione, 208
Electrocatalytic oxidation of reduced nicotinamide adenine dinucleotide (NADH) at a chlorogenic acid modified glassy carbon electrode, 14
Electro-oxidation of *meso*-erythritol on platinum in acid medium: analysis of the reaction products, 101
Electrochemical catalysis
Mechanism of stereoselective production of *trans*-1-decalone by electrochemical catalysis in microemulsions, 31
Electrochemical impedance spectroscopy
Electrochemical recognition of metal cations by poly(crown ether ferrocene) films investigated by cyclic voltammetry and electrochemical impedance spectroscopy, 24
Electrochemical mechanism
Mechanistic investigation of the anodic oxidation of *p*-methoxytoluene in dry and wet acetonitrile, 85
Electrochemical oxidation
Electrochemical oxidation of poly[(hexamethyltrisilanylene)-oligo(2,5-thienylene)] films, 158
Electrochemistry
Electrochemical studies on *c*-type cytochromes at microelectrodes, 76
Electrodeposition
The kinetics of mercury nucleation from Hg_2^{2+} and Hg^{2+} solutions on vitreous carbon electrodes, 39
Electrolysis
Electro-oxidation of *meso*-erythritol on platinum in acid medium: analysis of the reaction products, 101
Mechanistic investigation of the anodic oxidation of *p*-methoxytoluene in dry and wet acetonitrile, 85
Electrooxidation
Infrared spectroelectrochemistry of the oxidation of absolute methanol at a platinum electrode, 93
EQCM
Diamond-like carbon electrodes in electrochemical microgravimetry 230
Erythritol
Electro-oxidation of *meso*-erythritol on platinum in acid medium: analysis of the reaction products, 101
Exchange current density
A new approach to metal electrodeposition at a periodically changing rate: Part I. The reversing overpotential method, 245

Facilitated ion transfer
Voltammetric analysis of Cs^+-DB18C6 complex stoichiometry at the water | 1,2-dichloroethane interface, 54
Fast cyclic voltammetry
Digital simulation of fast cyclic voltammogram by integration of the double layer charging current, 215
Fast dropping electrode
The fast dropping oil | water electrode, 128
Fitting of spectra
Spectroelectrochemistry for a coupled chemical reaction in the channel cell: Part II. Kinetics of hydrolysis and the absorption spectrum of *p*-benzoquinoneimine, 181
Functionalized polypyrrole
Electrochemical recognition of metal cations by poly(crown ether ferrocene) films investigated by cyclic voltammetry and electrochemical impedance spectroscopy, 24

Hemeproteins
Characterization of protein monolayers by surface plasmon resonance combined with cyclic voltammetry 'in situ', 198
Horse heart cytochrome *c*
Electrochemical studies on *c*-type cytochromes at microelectrodes, 76

Ideally polarizable electrode
Studies of structural disorder of self-assembled thiol monolayers on gold by cyclic voltammetry and ac impedance, 61

Implicit difference method
Spectroelectrochemistry for a coupled chemical reaction in the channel cell: Part I. Theoretical simulation of an EC reaction, 176
Infrared spectroelectrochemistry
Infrared spectroelectrochemistry of the oxidation of absolute methanol at a platinum electrode, 93
Intrinsic rate constant
Solvent effect on kinetics of the chloride ion cleavage from anion radicals of 4-chlorobenzophenone, 259
Ion-selective membrane
Ion sensors using one-component room temperature vulcanized-type silicone rubber matrices, 135
ITIES
Voltammetric analysis of Cs^+-DB18C6 complex stoichiometry at the water | 1,2-dichloroethane interface, 54

Lamellar composite
Modified electrodes based on mixed bentonite vanadium(V) oxide xerogels, 48
Light effect
Comments on 'On the calculation of surface concentration from the measurement by the radiotracer 'electrode lowering' technique' by D. Poskus, 118

Macro and microelectrodes
Electrochemical studies on *c*-type cytochromes at microelectrodes, 76
Membrane electrochemistry
Convective electrodiffusion processes through graft-modified charged porous membranes, 222
Mercury(I)
The kinetics of mercury nucleation from Hg_2^{2+} and Hg^{2+} solutions on vitreous carbon electrodes, 39
Mercury(II)
The kinetics of mercury nucleation from Hg_2^{2+} and Hg^{2+} solutions on vitreous carbon electrodes, 39
Methoxybenzenes
Mechanistic investigation of the anodic oxidation of *p*-methoxytoluene in dry and wet acetonitrile, 85
Microband electrode
Cationic systems as self-assembled monolayers on gold surfaces, 263
Microelectrode
A microelectrode study of the catalysis of alkyl halide reduction by Co(II)(salen), 168
Microemulsions
Mechanism of stereoselective production of *trans*-1-decalone by electrochemical catalysis in microemulsions, 31
Modified electrode
Electrocatalytic oxidation of NADH at graphite electrodes modified with osmium phenanthrolinedione, 208
Electrocatalytic oxidation of reduced nicotinamide adenine dinucleotide (NADH) at a chlorogenic acid modified glassy carbon electrode, 14
Electrochemical recognition of metal cations by poly(crown ether ferrocene) films investigated by cyclic voltammetry and electrochemical impedance spectroscopy, 24
Modified electrodes
Modified electrodes based on mixed bentonite vanadium(V) oxide xerogels, 48
Monolayers
Cationic systems as self-assembled monolayers on gold surfaces, 263
Characterization of protein monolayers by surface plasmon resonance combined with cyclic voltammetry 'in situ', 198
Monosaccharides
Electrochemical oxidation of mono- and disaccharides at fresh as well as oxidized copper electrodes in alkaline media, 252

NADH
Electrocatalytic oxidation of NADH at graphite electrodes modified with osmium phenanthrolinedione, 208
Electrocatalytic oxidation of reduced nicotinamide adenine dinucleotide (NADH) at a chlorogenic acid modified glassy carbon electrode, 14
Ni–Co–Cu oxides
Effect of the partial replacement of Ni or Co by Cu on the electrocatalytic activity of the $NiCo_2O_4$ spinel oxide, 187

Ohmic drop
Digital simulation of fast cyclic voltammogram by integration of the double layer charging current, 215
Oil | water interface
The fast dropping oil | water electrode, 128
Os-phendione
Electrocatalytic oxidation of NADH at graphite electrodes modified with osmium phenanthrolinedione, 208
Oxidation
Cationic systems as self-assembled monolayers on gold surfaces, 263
Electrochemical oxidation of mono- and disaccharides at fresh as well as oxidized copper electrodes in alkaline media, 252
Oxygen evolution
Effect of the partial replacement of Ni or Co by Cu on the electrocatalytic activity of the $NiCo_2O_4$ spinel oxide, 187

Para-methoxytoluene
Mechanistic investigation of the anodic oxidation of *p*-methoxytoluene in dry and wet acetonitrile, 85
p-Benzoquinoneimine
Spectroelectrochemistry for a coupled chemical reaction in the channel cell: Part II. Kinetics of hydrolysis and the absorption spectrum of *p*-benzoquinoneimine, 181
Photoelectrochemistry
Photoelectrochemical response and stability of titanium–zinc mixed oxide films formed by thermal oxidation, 238
Platinum
Electro-oxidation of *meso*-erythritol on platinum in acid medium: analysis of the reaction products, 101
Poly[(hexamethyltrisilanylene)oligo(2,5-thienylene)]
Electrochemical oxidation of poly[(hexamethyltrisilanylene)-oligo(2,5-thienylene)] films, 158
Pt electrode
Infrared spectroelectrochemistry of the oxidation of absolute methanol at a platinum electrode, 93
Pyrrole
Investigation of the lifetimes of some pyrrole species by rapid scan cyclic voltammetry and double potential step techniques, 123
Pyruvate oxidase
Pyruvate sensor based on pyruvate oxidase immobilized in a poly(mercapto-*p*-benzoquinone) film, 143
Pyruvate sensor
Pyruvate sensor based on pyruvate oxidase immobilized in a poly(mercapto-*p*-benzoquinone) film, 143

Radioactive labeling
Comments on 'On the calculation of surface concentration from the measurement by the radiotracer 'electrode lowering' technique' by D. Poskus, 118
Reaction mechanisms
Electro-oxidation of *meso*-erythritol on platinum in acid medium: analysis of the reaction products, 101

Reduction
Electro-enzymatic reduction of dioxygen to water in the cathode compartment of a biofuel cell, 110
Reductive cleavage
Solvent effect on kinetics of the chloride ion cleavage from anion radicals of 4-chlorobenzophenone, 259
Reversing overpotential
A new approach to metal electrodeposition at a periodically changing rate: Part I. The reversing overpotential method, 245
$[Ru(bpy)_3]^{3+}$
Diamond-like carbon electrodes in electrochemical microgravimetry, 230

Self-assembled monolayer
Studies of structural disorder of self-assembled thiol monolayers on gold by cyclic voltammetry and ac impedance, 61
Semiintegration
Convolutive modelling of electrochemical processes based on the relationship between the current and the surface concentration, 1
Silicone rubber
Ion sensors using one-component room temperature vulcanized-type silicone rubber matrices, 135
Simulation
Evaluation of model and dispersion parameters and their effects on the formation of constant-phase elements in equivalent circuits, 68
Solid-state sensor
Ion sensors using one-component room temperature vulcanized-type silicone rubber matrices, 135
Solvent effect
Solvent effect on kinetics of the chloride ion cleavage from anion radicals of 4-chlorobenzophenone, 259
Spatial distribution
The kinetics of mercury nucleation from Hg_2^{2+} and Hg^{2+} solutions on vitreous carbon electrodes, 39
Spectroelectrochemical channel cell
Spectroelectrochemistry for a coupled chemical reaction in the channel cell: Part II. Kinetics of hydrolysis and the absorption spectrum of *p*-benzoquinoneimine, 181
Spectroelectrochemistry
Electrochemical oxidation of poly[(hexamethyltrisilanylene)-oligo(2,5-thienylene)] films, 158
Spectroelectrochemistry for a coupled chemical reaction in the channel cell: Part I. Theoretical simulation of an EC reaction, 176
Spinel
Effect of the partial replacement of Ni or Co by Cu on the electrocatalytic activity of the $NiCo_2O_4$ spinel oxide, 187
Stereoselectivity
Mechanism of stereoselective production of *trans*-1-decalone by electrochemical catalysis in microemulsions, 31
Surface plasmon resonance
Characterization of protein monolayers by surface plasmon resonance combined with cyclic voltammetry 'in situ', 198
Surface roughness
Studies of structural disorder of self-assembled thiol monolayers on gold by cyclic voltammetry and ac impedance, 61
Surface stoichiometry
An old workhorse of oxide investigations: new features of Co_3O_4, 149

Tafel equation
Evaluation of model and dispersion parameters and their effects on the formation of constant-phase elements in equivalent circuits, 68
Thermal oxidation
Photoelectrochemical response and stability of titanium–zinc mixed oxide films formed by thermal oxidation, 238
Titanium
Photoelectrochemical response and stability of titanium–zinc mixed oxide films formed by thermal oxidation, 238

Vanadium oxide
Modified electrodes based on mixed bentonite vanadium(V) oxide xerogels, 48
Variable permeability membranes
Convective electrodiffusion processes through graft-modified charged porous membranes, 222
Vitamin B_{12}
Mechanism of stereoselective production of *trans*-1-decalone by electrochemical catalysis in microemulsions, 31
Voltammetric modelling
Convolutive modelling of electrochemical processes based on the relationship between the current and the surface concentration, 1
Voltammetry
An old workhorse of oxide investigations: new features of Co_3O_4, 149

X-ray photoelectron spectroscopy
Effect of the partial replacement of Ni or Co by Cu on the electrocatalytic activity of the $NiCo_2O_4$ spinel oxide, 187

ZnO
Photoelectrochemical response and stability of titanium–zinc mixed oxide films formed by thermal oxidation, 238
